

COURSE DESCRIPTION

The difference in standards is so great that you must start planning for this new protocol now. During this 2 part webinar series, we will dig in and discover how very different this new NSPIRE protocol is from the decades old UPCS.

Day #1 | May 19 @ 1:30 pm Eastern Time

NSPIRE | Outside: At this webinar's completion, you will thoroughly understand the NSPIRE standards related to the "Outside" (this is the "Site" and "Exterior" of the old UPCS). By using multiple photos and real-life examples, together we will examine how different and challenging these new standards are and what you need to be doing right now in anticipation of future REAC inspections.

Day #2 | May 20 @ 1:30 pm Eastern Time

NSPIRE | Inside and Unit: REAC's new focus will be the "Unit" and will account for 50% of your overall REAC score. At this webinar's completion, you will thoroughly understand the NSPIRE standards related to the "Inside" (common areas and systems) and "Unit". By using multiple photos and real-life examples, together we will examine how different and challenging these new standards are and what you need to be doing right now in anticipation of future REAC inspections.
